2017

YEARBOOK

A functional apartment that provides customers with a true smart home experience

// PROJECT
La Maison

// INSTALLER
Henri, Integrateur Domotique

WINNER

Best Showroom
EMEA

When Henri decided to design its showroom, the aim was to have a space that would welcome people “home.” The integrator wanted to be able to invite customers into a warm and comfortable place and provide them with the opportunity to meet the people who would be working in their homes.

Understanding that technology is just one part of a wider project, emphasis was also placed on the architecture and design of the showroom. At the same time, it was important to showcase the solutions and functionalities that Henri offers, so these elements had to come together into one.

The fully functional apartment consists of a living room, kitchen, bedroom, bathroom, and office space, and features lighting and blind control, security, HVAC, and an AV system that includes in-ceiling, invisible, flush-mounted, bookshelf and waterproof speakers, multiple televisions, a projector, and a mirror TV in the bathroom. Various controls systems are placed around the apartment.

The end goal was for customers to discover and fully experience living in an integrated home. Knowing that this can't be accomplished in just an hour, the integrator hands customers the keys and invites them to stay in the apartment to truly enjoy this way of life.

EQUIPMENT LIST

- Agath 18" mirror television*
- AKG microphone and receiver*
- Axis cameras and decoder for CCTV*
- Bowers & Wilkins speakers, subwoofer and amplifier*
- Crestron DigitalMedia and 3-Series control system*
- Crestron sensors, touchscreens and remotes*
- ELMDENE door and window contact and alarm siren*
- Fusion Research streamer IP/AirPlay*
- Future Automation lifts*
- Honeywell control panel and keypad*
- Kramer HDMI/Audio minijack panel*
- Linksys phone adapter*
- Lutron blinds, shades and drapery*
- Lutron processor, modules and keypads*
- Luxul wireless access points, controllers and switches*
- Mejpac 4-button keypad*
- Middle Atlantic rack and accessories*
- Rotel surround sound receiver*
- Screen Research acoustic transparent in-ceiling screen*
- Siedle video door station, BUS indoor phone and access control systems*
- Sonance speakers, amplifier and subwoofer*
- Sony projector and televisions*
- Vismes amplifiers, compact speakers and compact subwoofer*

WINNER

Best Dressed Rack
 EMEA

*"Well labelled,
 colour coded...
 a lovely piece of
 work."*

Henri won the Best Dressed Rack category as they designed and installed a rack that is well labelled, colour coded, and basically a lovely piece of work that ticks all the boxes. Housed in the lobby of the cinema room, the glass fronted cabinet creates a true showcase of the integration taking place in this huge property. The rack is just as impressive from the front, and the back.

EQUIPMENT LIST

- Apple TV 6b Gb
- Autonomic MMS-1
- Bowers & Wilkins SA1000
- BSS BLU160
- BSS BLU-BIB
- CanalSat TV Decoder
- Classé CT-5300
- Crestron CE-CI3-3
- Crestron CEN-NSP1
- Crestron CP3
- Crestron DM-MD32x32
- Crestron DM-PSU-16
- Crestron DM-PSU-8
- Crestron DVPHD-4
- Crestron PRO3
- Crown DCI-8300N
- Integra DTR-70.6
- Kaleidescape Alto
- Lumagen Radianc PRP-4440
- Oppo BDP-103EU-MRZ Blu-ray player
- Trinnov Altitude 32-1632

Winning Formula

// INSTALLER
Finite Solutions

With the client renovating his home and digging down for a large basement, the brief to Finite Solutions was for a no compromise solution that delivered performance, functionality, and aesthetics. The integrator was involved at the earliest stage and worked with the architect, electrical, and heating contractors to provide full 3D CAD drawings.

A Crestron control system was installed at the heart of this smart home, and integrated with AV systems, HVAC, blind control, lighting, access control, security, and a cinema room to provide the client with seamless control.

Professional lighting design and control were pivotal in achieving the design and functionality result that the client desired. Finite Solutions installed Lutron HomeWorks QS to deliver — at the touch of a button, or via lighting scenes — numerous lighting scenes with beautiful uniform dimming.

// INSTALLER
Henri, Integrateur Domotique

The client briefed Henri to install a system that featured cutting-edge technology, provided scalability, total integration, and is easy to use.

Following the client's request to integrate all systems in the house, Henri focussed on lighting and shading, multiroom AV, HVAC, security, a building management system, and multiple cinema rooms. The system is controlled via Crestron interfaces. For such a large property, 13 touchscreens, five remote controls, one waterproof remote, and eight wall docking stations were installed.

Everything was integrated into the control system, even the swimming pool. Henri created a solution that allows users to trigger current, the waterfall, and jet streams, and complete water regulation system.

The main cinema room includes a professional Christie projector, Trinnov Altitude32 Dolby Atmos processor, and B&W subwoofers and speakers.
